0,911 kg/m

Code: **PS-1337**
0,902kg/m

Double-sash gates, doors and other SHIPRADE products are screwed together using jointless technology. This solution allows for random modifications of a final product. SHIPRADE gate system solutions eliminate vertical gaps between panels, doors, gates and posts. The lack of vertical gaps guarantees a coherent design of the whole fence.

All made from high quality aluminium and in numerous design variants, allowing freedom in Creativity!

Customization...

SHIPRADE offers multiple lamella options from round, square shape to decorative styles. Sash and adapter profile give chance to produce different style of doors..
